

Don't let a leak lead to a loss.

PROTECT WITH waterleak X systems™

A plumbing leak can cause major damage at your home or business, and it happens more often than you'd think. In fact, plumbing system failure ranks as a top 5 reason for insurance claims every year. Before you even realize there's a problem, your walls, carpet, furnishings and irreplaceable belongings can be ruined.

Waterleak X Systems can assist in preventing this scenario from ever happening.

Affordable and easy to install, it detects leaks as soon as they start, shuts off the main water valve, and instantly alerts you there is a problem via text or email.

INSTANT ALERT

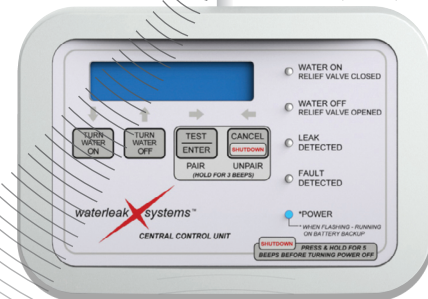

Sent via text or email.

CONSTANT PROTECTION

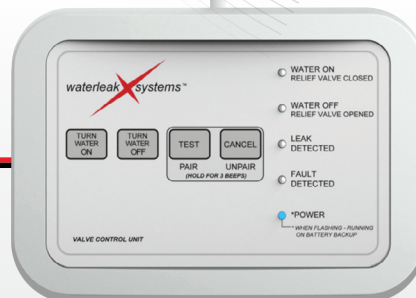

Waterleak X Systems communicates via radio waves and routinely checks each component to insure the system is functioning properly. The system's battery backup ensures uninterrupted operation in the event of a power failure.

PRESSURE TO HUNDREDS OF POTENTIAL LEAK POINTS

Water Detection Unit Skinny Sensor (WDUSS)

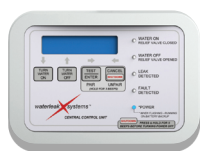

Water Detection Unit (WDU)

Basic System

WaterleakXBasic System contains the following necessary components for a complete water detection system:

Central Control Unit, Qty 1 (CCU-001)

The brains of the system, it is used to pair all components, and sends alerts to up to three email addresses or cell phones with location, facility, and shut off status.

Water Detection Units, Qty 2 (WDU-003)

Each sensor has a unique serial number that reports the exact location of a leak. Up to 49 can be paired into a system.

Water Detection Unit Skinny Sensor, Qty 1 (WDUSS-004)

Plug into the Water Detection Unit and slide under low sitting appliances such as refrigerators and dishwashers.

Valve Control Unit, Qty 1 (VCU-002)

Receives a radio signal from the Central Control Unit when water is detected and directs the Water Shutoff Valve to close. Can also be controlled manually.

Water Shutoff Valve for 1 inch Pipe, Qty 1 (WSV-1)

When directed, will turn off the main water supply.

BENEFITS

- Easy to install
- Expandable - up to 49 sensors
- Battery backup power
- Self-monitoring
- Well system adaptable
- Suitable for residential and commercial properties
- Insurance discounts
- Instant notification
- Peace of mind

Optional Components

Signal Repeater/Temp Sensor (SRTS 005)

Strengthens signal when used in a larger facility and reports low and high temperatures. Multiple units can be used in a system.

Solid State Well Relay (WR-006)

Upon leak detection the system shuts down well pump.

Water Shut off Valve for 1 inch Pipe (WSV-1)

For use in 1 inch pipe systems. Can also be used as a relief valve.

Water Shut off Valve for 1 1/2 inch Pipe (WSV-1-1/2)

For use in 1 1/2 inch pipe systems.

Water Detection Unit (WDU-003)

Up to 49 can be installed per system.

Water Detection Unit Skinny Sensor (WDUSS-004)

Up to 49 can be installed per system.

Water Detection Unit Extension Probes (WDUXP-303)

4-pack. 2 required for each WDU-003.
